Dear Aquaculture specialist,

BlueBioTech GmbH produces **high quality microalgae concentrates** for your Hatchery applications. These products are successfully applied by hatcheries around the world since many years.

Nannochloropsis Starter Concentrate	Nannochloropsis Concentrate	Nannochloropsis Frozen Paste
6•10 ⁹ cells/mL, 2-5µm cell size	12•10 ⁹ cells/mL, 2-5µm cell size	40•10 ⁹ cells/mL, 2-5µm cell size
77 g/L dry weight	144 g/L dry weight	476 g/L dry weight
EPA: 4% of dry weight	EPA: 4% of dry weight	EPA: 4% of dry weight
Live algae in sterile seawater	Fresh algae in sterile seawater	Frozen algae
2 month storage at 5°C to 10°C	3 month storage at 5°C to 10°C	2 years storage at -20°C
•Large scale starter culture	•Rotifer growth •EPA enrichment •Perfect GreenWater	•Rotifer growth •EPA enrichment •Perfect GreenWater
59 EUR / L (basic price)	76 EUR / L (basic price)	72 EUR / L (concentrate equivalent)

The **Nannochloropsis StarterConcentrate** consists of live Nannochloropsis cells and works perfect as a starter culture for your large scale algae production systems.

The **Nannochloropsis Concentrate** consists of fresh Nannochloropsis cells providing highest quality algae for Rotifer growth and GreenWater.

The **Nannochloropsis Frozen Paste** is a **revolutionary** product that consists of frozen Nannochloropsis cells providing long storage, cheap transport and reliable backup solution at reduced price. Our customers report excellent results as good as with the fresh concentrate.

-The success of our customers is the best proof for quality-

BlueBioTech GmbH is one of the leading european microalgae producers. Production in state-of-the-art closed photobioreactors is certified by the official german feed agency. We guarantee optimal biological characteristics due to world leading monitoring of algae cell viability.

Based on this we offer a **reliable and standardized quality** throughout the year independent from weather conditions or contaminations.

No preservatives

Maximum nutritional quality

Perfect single-cell GreenWater

No biofouling

Easy handling
